BRIEF ABSTRACT OF LETTER

Requests sanction to the resolution of the Bd to grant Rs 2500/- towards the starting of a Govt Grainage at Kankanhally for increasing the supply of Govt breed layings required by the sericulturists in area.

NOTES AND ORDERS.

A printed copy of the sanctioned budget of the Bd for 35-36 is put up.

2. The Bd proposes to meet Rs 500 of this grant from of the Economic Development grant in their budget, the remain Viz Rs 2000/- from out of the closing balan The closing balance as estimated would be Rs 33787 it may, perhaps, be possible for the Bd to meet Rs out of this, but the proposal to meet Rs 500/- out of the grant

OFFICE OF THE PRESIDENT,
BANGALORE DISTRICT BOARD.

No. CR 470/35-36 Bangalore, 18th February 1936

3982/2

From

V. VENKATAPPA, ESQ.,
PRESIDENT, DISTRICT BOARD,
BANGALORE.

To

The Secretary to
The Government of Mysore,
Development Department,
Bangalore, City.

Through:
The Deputy Commissioner, Bangalore District

SIR,

I have the honour to state that the Superintendent of Sericulture in Mysore with his letter No. 5344 dated 22nd June 1935 forwarded a note (copies enclosed for reference) for - starting a Government Grainage at Kankanhalli for increasing the supply of Cross Breed laying required by the Sericulturists in the area for the consideration of the Board for the grant of Rs. 3,450/- together with a building for the purpose and the same was placed before the District Board at their meeting held on 1st February 1936 and after due consideration of the question both by the Economic and Standing Committees, they resolved to pay a sum of Rs. 2,500/- in all (Rs. 500/- out of Economic Development Fund and Rs. 2,000/- out of the Closing Balance of the District Board) for the purpose.

A copy of the resolution passed on the subject is herein enclosed for favour of information.

I request that necessary sanction of Government to the resolution of the Board may kindly be obtained and communicated to this office.

DEPUTY COMMISSIONER'S OFFICE

I have the honour to be,
SIR,
Your most obedient servant,
G. C. Veerappa
for PRESIDENT,
District Board.

PROCEEDINGS OF THE ORDINARY MEETING OF THE BANGALORE DISTRICT BOARD, HELD ON SATURDAY THE 1st February 1936 AT 12 NOON.

xx xx xx

1. Letter No. 5344 dated 22nd June 1935 from the Superintendent of Sericulture in Mysore, Bangalore, forwarding a note for starting a Government Grainage at Kankanhalli for increasing the supply of cross breed layings required by the Sericulturists in the area for the consideration of the Board for the grant of the sum together with building as per details furnished in the note &c

RESOLUTION OF THE STANDING COMMITTEE:- Resolved that in addition to a sum of Rs. 500/- from Economic Development Funds another sum of Rs. 2,000/- may be paid from the Closing Balance in all Rs. 2,500/-

RESOLUTION OF THE ECONOMIC COMMITTEE:- Rs. 500/- might be given out of this Economic Funds for Sericultural Grainage at Kankanhalli, as it is a desirable scheme.

RESOLUTION:- S a n c t i o n e d.

xx xx xx

Sd/- V. Venkatappa,

P r e s i d e n t,
District Board.

"C o p y"

G. C Veerappa
P r e s i d e n t,
District Board.

The urgent need to start a Government Grainage at Kankanhalli to increase the supply of Cross Breed layings to Sericulturists in the area.

The Sericulturists have suffered and are suffering due to the continued depression in the silk trade and the abnormal competition for cheap imported raw silk. The Government of India have afforded some amount of protection to the indigenous silk industry for a period of five years. The extent of protection afforded is inadequate and the period for which protection is afforded is too short taking into consideration the magnitude of the work to be done to reorganise the industry which is practised by illiterate, conservative and poor agriculturists in the interior villages.

To withstand competition in course of time with imported silk the cost of production of Mysore silk has to be reduced without affecting the income of the sericulturists. The measure to be adopted to achieve this object are the following:-

1. Improvement in the cultivation of mulberry so that the yield of leaves per acre is increased without increasing the cost of cultivation.

2. Improvement in the rearing of worms so that the Sericulturists harvest all the crops successfully, get more yield of cocoons per unit, and improve the quality of cocoons so that they contain more silk.

3. Improvement in the reeling of silk so that the price of Mysore silk approximates as much as possible the cost of imported silks similar quality.

All the above items of work are being attended to by this Department of Sericulture to the extent of facilities available.

To improve rearing, the seed supply has to be improved. The problem of seed supply is the basis of all improvement in the rearing of worms and production of cocoons. In addition to the adequate supply of disease free layings, timely technical assistance has to be rendered to the sericulturists by trained staff so that the ryots get the maximum benefit. It is a matter of common knowledge that the Sericulturist looses 40 per cent of the crops due to the bad seed This could be entirely prevented by using disease free seed, thus reducing costs of production of cocoons and ultimately that of silk. Again it has been found that cross breed seed got from crossing Mysore female moth with Japanese or Chinese male moth gives about 30 per cent better harvest, the cocoons contain more silk and the worms produce

produce cocoons in a much shorter period than Mysore worms.

The supply of disease free layings for the whole State was being made by six Government Grainages, 16 aided grainages and 15 Sericultural Co-operative Societies. The quantity of layings supplied to Sericulturists has been increased from 7½ lakhs of layings in 1927-28 to 38 lakhs of layings in 1933-34. This supply is meagre compared to the total requirement of 400 lakhs of layings for the whole state. In order to increase the supply of disease free layings to sericulturists more aided grainages will be started early.

In these days of depression, the sericulturists are anxious to rear the cross breed worms as these worms take less time from start to finish and yield a larger quantity of cocoons per unit than the Mysore worms. The supply of cross breed layings which amounted to about 2 lakhs in 1927-28 amounted 12½ lakhs of layings in 1933-34. To meet the increased demand for cross breed layings, some of the aided grainages were given facilities recently to prepare cross breed layings, the equipment has been strengthened in Government Grainages and a new Government Grainage was started at Talagawara in Chintamani Taluk. During the current year, up to end of May 1935, altogether about 18 lakhs of cross breed layings have been made available to the sericulturists as against about 10 lakhs of cross breed layings during the same period in 1933-34

The area under mulberry in Kankanhalli Taluk which amounted to about 650 acres in 1931-32 went down to 450 acres in 1933-34. The total quantity of layings required for this area is about 5 lakhs of disease free layings per year. At present the seed requirements of this area is met by the seed supply from the Government Grainage at Channapatna and from the aided grainage at Satanur. But the Government Grainage at Channapatna which prepares about 10 lakhs of layings per year has to supply the seed to sericulturists all over the Bangalore District and a portion of Mysore District. The total area under mulberry in the taluks comprising Channapatna Circle amounts to about 6,000 acres and as the seed requirements of this area amount to about 60 lakhs of layings per year, and as the Channa-

patna

Channapatna Government Grainage has to supply layings, for the whole circle, the layings available for the sericulturists in Kankanhalli area is necessarily limited.

The Sericulturists in Kankanhalli area have been rearing cross breed layings for a number of years, have understood, the value of the same and are demanding a larger supply of cross breed layings. The demand cannot be met in spite of all efforts made to increase the output in the Government Grainage at Channapatna. Government have been doing their best to increase the output of cross breed layings but it is necessary that local bodies such as the District Boards, Municipalities and the Village Panchayets also interest themselves in increasing the availability of cross breed layings required by the Sericulturists by augmenting the resources of the Department of Sericulture.

The Sericulturists in Kolar District had the same difficulty with regard to supply of cross breed layings. The Kolar District Board generously placed a spacious building at the disposal of Government at Talagawara in Chintamani Taluk and contributed Rs. 2,500/- out of District Board funds towards the cost of initial equipment of the grainage. Government kindly sanctioned staff required for this grainage as also the recurring expenditure. The result has been that within the course of about 4 months a fully equipped Government Grainage has been started at Talagawara and this Grainage has already prepared and distributed about 40,000 cross breed layings during April and May 1935.

The starting of a Government Grainage at Kankanhalli would be of great benefit to the sericulturists in the area. If the Bangalore District Board can kindly arrange to place a spacious building at the disposal of the sericultural Department and contribute a sum of Rs. 3,450/- towards the initial equipment of this grainage (as per details enclosed) Government will be moved to sanction the necessary staff and funds for recurring expenditure required for this new Government Grainage at Kankanhalli. The District Board, Bangalore, may kindly come to the assistance of

9

of the poor sericulturists in the area in these hard days by giving the building and the amount required for initial expenditure for starting a Government Grainage at Kankanhalli.

"C o p y"

P r e s i d e n t,
District Board.

Grainage equipment for starting a Government Grainage at Kankanhalli.

1. Two microscopes - Rs. 210/- each.	Rs. 420	0	0
2. 8 Moth crushing sets - Rs. 20/- each.	160	0	0
3. 40,000 conical tin rings Rs. 12/- per 1000	480	0	0
4. 15 Jungle wood stands for moths, cocoons &c. - Rs. 20/- per per stand.	300	0	0
5. Bomboo trays 200 at 6 annas each.	75	0	0
6. One angle iron almirah for keeping eggs.	40	0	0
7. One Refrigerator.	800	0	0
8. Water tank, water pump connections &c. (300 gallons)	350	0	0
9. 50 trays (tin) for keeping moths.	12	8	0
10. Four Zinc trays for washing eggs &c	8	0	0
11. Thermometers and Hygrometers.	22	8	0
12. One bucket sprayer.	22	8	0
13. Measuring cylinder and glass pans.	25	0	0
14. One union counter scale.	80	0	0
15. Miscellanous such as scissors, cover glass slides &c. ...	50	0	0
16. Electric light and power supply to the building and refrigerator.	300	0	0
Total.	3,145	8	0

Furniture:-

One office table, two examination tables, four chairs, 4 stools, 4 benches, one teakwood almirah, one record rack, one iron safe, one office clock, one alarm time piece &c. 300/-

Total. 3,445/- or 3,450/-.

Building required:-

2 rooms of 20ft x20ft each for preserving cocoons, moths and for locating the refrigerator.

2 rooms of 20ftx15ft. each for Office, examination of moths, washing of eggs, preserving of eggs

One room of 15 ft x 12 ft. for stores.

Capacity of Grainage - Five lakhs of layings per year.
